DETAILED ACTION

Oath/Declaration

The reissue oath/declaration is accepted.

Claim Rejections - 35 USC § 112

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. No support is seen in the specification for the recitation "benign or malignant" and "tumors." On page 4, lines 56-67, under "Summary of the Invention" the specification discloses that the compositions of the invention are used as anti-neoplastic drugs for treating leukemias, lymphomas and leiomyomas. The words "benign," "malignant," and "tumors" are seen nowhere in the specification. However, if the word "tumors" is used only to modify leiomomyoma then it is not considered new matter, since it is inherent that a leiomyoma is a benign tumor.

Upon reconsideration the earlier rejection under 35 USC 112, paragraph one to the claims not being enabled is withdrawn.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "benign or malignant lymphoma, leukemia, and/or leiomomyoma tumors" is confusing, since lymphoma, leukemia and leiomomyomas are malignant while

Art Unit: 1614

leiomyomas are benign. If the word "tumors" is used only to modify leiomomyoma it is still confusing, since it appears that the animal or human having it is required to have more than one tumor.

The earlier rejection under 35 USC 112, paragraph two is withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are again rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 5,962,478 for the reason given in the Paper of September 21, 2001.

Applicant argues that there is no implication in '478 that the instant compounds as a TNF- α can be used to treat a malignant tumor or a benign tumor and that the neoplastic reference disclosed in col. 20, line 4 is a situation where the injured tissue causes a release of TNF- α , which is then prevented by the administration of the instant compound. This is not persuasive. '478 discloses that by using the compounds to

Art Unit: 1614

block the release of excessive levels of TNF- α the compounds can be used to restore normal function in a tissue and treat neoplastic disease.

Information Disclosure Statement

It is noted that WO 96/27374 and Lee both disclose the use of the instant compounds to treat proliferative disease, including the instantly recited disorders. However, WO 96/27374 is not currently available to the Examiner to determine if it has support for the instant invention.
